

Environmental Requirements for Suppliers

Compliance with environmental requirements is a determining factor in customer loyalty. Therefore, the purpose of the environmental requirements is inform Suppliers about AEROMECH's environmental aspects, to ensure and document that these requirements are observed.

It is important to emphasize that the Rules and Instructions in this document cannot be construed as exhaustive, so it is Suppliers responsibility to take appropriate precautions to carry out their activities in accordance with current legislation.

General Requirements

- Comply with all national, community applicable legal and regulatory requirements in force;
- Provide all required document that prove the conformity of the organization or its employees for the execution of its activity, whenever there is any applicable requirement and to make sure it's product meet all legal requirements;
- Collaborate to improve AEROMECH's Environmental Management System performance beyond legal compliance;
- It is expected that Suppliers consider good practices regarding to energy and water consumption, greenhouse gas emissions, waste management etc;
- Suppliers must ensure that the information contained in these Regulations is disclosed and understood by their Employees and subcontractors and scrupulously fulfilled.

Transport and Handling Requirements

- It is expected that AEROMECH's Suppliers use environmentally friendly transport techniques that contribute to minimize environmental adverse impacts;
- Products labelled with an official eco-label;
- Suppliers must provide chymical products with it's Safety Data Sheets (SDS) that meet EU legal requirements in force;
- Products must be properly packed so that it can be transported without any damage;
- Chymical products handling must be in accordance with Safety Data Sheet requirements.

Compliance

Suppliers have a duty to proactively report to Compliance Monitoring Department any deviation from this policy.

AEROMECH reserves the right to audit the Supplier's and subcontractors compliance with these requirements.

In case of non-compliance with these requirements, a dialogue will be initiated in order to clarify the occurrence and if the Suppliers are not able to comply with AEROMECH's environmental requirements a corrective action plan will be agreed.

If the Suppliers cannot implement the consent conditions in order to become compliant within the agreed timeline, AEROMECH reserve the right to end the business agreement.

Legal requirements shall apply in all omissions of this regulation.
