

"SOCIAL RESPONSIBILITY AND ENVIRONMENTAL PRESERVATION MEANS A COMMITMENT TO LIFE."

Environmental Policy

AEROMECC, Mecânica de Aeronaves, SA, a company specialized in aircraft maintenance and its components, has decided as one of its fundamental strategies to implement an Environmental Management System in accordance with the NP EN ISO 14001 standard.

AEROMECC's Top Management sees the Environmental Management System as the means to manage its environmental sustainability, its environmental aspects, risks, emergencies, legal requirements and continuous organizational improvement.

In this sense, AEROMECC commits to respect the following guiding principles:

- ❖ Comply with legislation and other regulations relating to the Environment, as well as other requirements to which it voluntarily subscribes.
- ❖ Continuous improvement of the company's Environmental Management System, in order to improve its environmental performance.
- ❖ Promote the efficient use of natural resources and ensure that the consumption of these resources is maintained within the sustainability standards defined by the organization.
- ❖ Responsibly manage the waste produced by the company activity, focusing on its recovery.
- ❖ Identify, control and minimize the environmental aspects of the company and the associated impacts and risks, in order to establish a preventive approach, protecting the Environment and preventing pollution.
- ❖ Raise awareness and train employees in relation to the Environmental Management System, knowledge and prevention of its potential environmental impacts, promoting a culture of sustainability, as well as providing the necessary resources for the proper functioning of the System.
- ❖ Promote a corporate culture where business initiatives and activities and the management of the System are consistent with local and global environmental sustainability, including minimizing potential impacts on climate change.
